a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US05/27261

Box No. V Reasoned statement under Rule 43 *bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>11-20</u>	YES
	Claims <u>1-10</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-20</u>	NO
Industrial applicability (IA)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 11-20 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the specific methods of making the instant silver particles & coatings.

Claims 1-10 lack novelty under PCT Article 33(2) as being anticipated by SAWAN or MAWATARI, as both show the claimed silver aqueous compositions & processes.

Claims 1-20 lack an inventive step under PCT Article 33(3) as being obvious over SAWAN in view of MAWATARI, since both references teach making silver antimicrobial compositions for coating medical devices, and the processes can be used as modified by MAWATARI, yielding superior resistance to coated articles

Claims 1-20 meet the criteria set out in PCT Article 33(4), and thus provide industrial applicability because the subject matter claimed can be made or used in industry.
